## Objective

Utilize over 15 years of experience in front-end web development, interface design, and graphic design while continuing to learn innovative technologies.

## Professional Experience

### Sr. Design Engineer

*McClatchy Interactive, March 2013 to Present*

Design and develop wireframes, mockups, and functional prototypes for the third largest newspaper company in the United States. Utilize usability testing to evolve device agnostic designs to improve company initiatives and user experience. Implement changes and resolve tickets in an agile environment.

### Creative Director / Sole Proprietor

*WebMark Art. Oct. 1998 – Present*

Design, development, and maintenance for small to medium sized business websites. Specializing in custom responsive designs and WordPress sites.

### Design Engineer

*McClatchy Interactive, February 2007 to Present*

Designed and provided front-end code for proprietary CMS interface used by 30 newspapers across the United States and Canada. Developed functionally coded mockups for various company initiatives. Created and maintained company website, Intranet, Extranet, and registration database.

### GUI Developer

*McClatchy Interactive, November 2004 to February 2007*

Designed and developed the user interface for our enterprise templating, content management and registration software used throughout the Newspaper industry. Responsible for the design, development, and implementation of internal, affiliate, and customer websites for The McClatchy Corporation and their 30 daily newspaper markets.

### Development Manager / Senior Web Developer

*Professional Equipment Inc., May 2003 - August 2004*

Managed a staff of four front-end developers in the creation and maintenance of over 600 client websites. Coordinated the Development and Customer Service teams to ensure quality control and customer satisfaction. Developed server-side scripts to reduce redundancies across our customer sites and to increase speed of production.

### Web Developer

*Manchester Technologies Inc., Feb. 2000 - Sept. 2001*

Responsible for daily design and programming updates of corporate websites and web applications.

## Skills

Extensive background in HTML, CSS, Bootstrap, Agile development, jQuery, JavaScript, Adobe CS5 Suite, WordPress, and Microsoft Office.

## Education

*Bachelor of Arts Degree, Communications, Cum Laude*

Concentration: Multimedia; Minor: English

Marist College, Poughkeepsie, NY

## Accolades

- August 2008 and December 2008 - "Top Dog" peer recognition award for work beyond typical responsibilities
- December 2003 - Employee of the Month
